

New Workshop Building in Berlin, Germany

Deutsche Bahn Energie GmbH

Realisation Period: 2017 - 2019

Services: General Engineering

Investment: 4.5 mill EUR

At this location in Berlin, DB Energie is investing in a new workshop building for its 130 employees.

It will include and combine workshops, warehouse, assembly hall and offices as one single unit. This concept will create an efficient working environment for the staff.

The building will be erected with two floors and consists of 4 areas: workshop, warehouse, assembly hall and office.

The workshop will provide the space for welding and measurement and testing equipment.

The large assembly hall with a 5-tons-crane is divided in a testing, assembly and storage area for technical and test equipment.
